

State of Independence

Richard Fairhurst
State of the Map 2022

Should Britain remain in the European Union?

Northern Ireland shares a completely porous border with Ireland, which is in the European Union. Trade issues could arise between the two.

	POP. (M)	REMAIN	LEAVE
Britain	65.1	48%	52%
England	54.8	47%	53%
Scotland	5.4	62%	38%
Wales	3.1	48%	53%
N. Ireland	1.9	56%	44%
London	8.5	60%	40%

The Scottish first minister has said that a leave vote could trigger a referendum vote in Scotland to leave Britain. Scots rejected independence in a referendum in September 2014 by 55 percent to 45 percent.

London, along with Scotland, led the vote to remain in the European Union, though the east side of the city voted to leave.

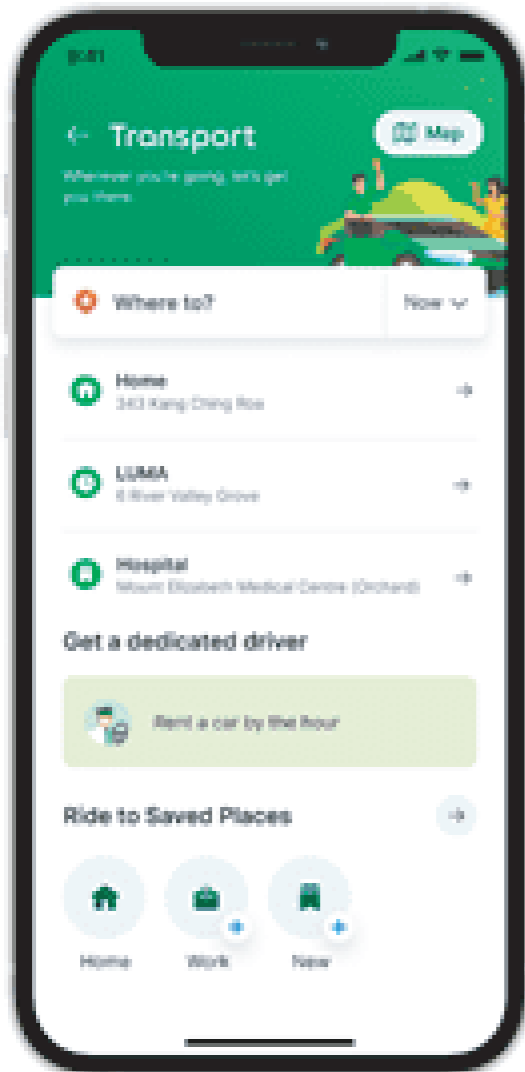

The majority of Wales voted strongly to leave, except for the largest city Cardiff, which voted to remain by 60 percent.

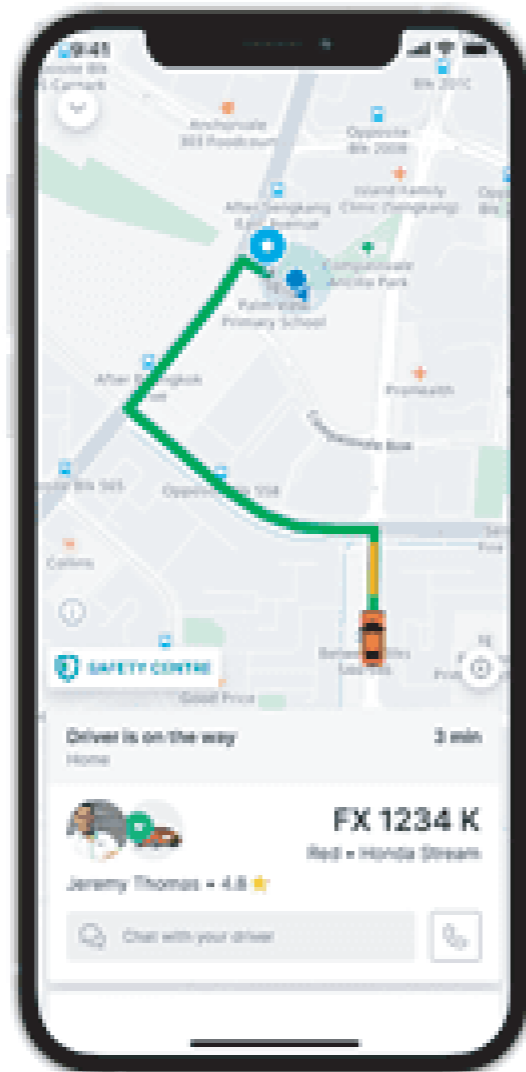

The image features a central graphic of stylized, 3D block letters. The text is arranged in three lines: 'THE' at the top, 'UNSTOPPABLE' in the middle, and 'ADVANCE OF OPENSTREETMAP' at the bottom. The letters have a gradient from red to yellow and are set against a dark background with a sunburst pattern of light rays. Small blue and yellow stars are placed at the beginning and end of the main text lines.

Google exec suggests Instagram and TikTok are eating into Google's core products, Search and Maps

Sarah Perez @sarahintampa / 10:57 PM GMT+1 • July 12, 2022

 Comment

In a discussion about the evolution of search, he somewhat offhandedly noted that younger users were now often turning to apps like Instagram and TikTok instead of Google Search or Maps for discovery purposes.

“We keep learning, over and over again, that new internet users don’t have the expectations and the mindset that we have become accustomed to.” Raghavan said, adding, “the queries they ask are completely different.”

"Assuming Google's efforts don't slow (and they show no sign of slowing), is it even possible for Apple to catch up to Google?"

Justin O'Beirne, Google Maps' Moat, 2015

"The three pillars of Google's comparative advantage are Places, Street View, and 3D data. But in a few years, I think it will mostly just be Places"

Joe Morrison, Google Maps' Moat is Evaporating, 2020

The Brewtorium is a locally-owned brewpub brewing delicious craft beer and serving up great food for all!

**What could possibly
go wrong?**

Three quotes...

“OpenStreetMap cares a lot about its independence and I think that’s totally fair when so many corporations benefit so much from it, and maybe see some value in having power in the organisation”

Tom MacWright, Geomob podcast, 2022

“As is the case with many mapping companies, Mapbox shifted focus to the auto industry. I’m a lifelong bicycle commuter, and I think cars are unequivocally bad. It’s hard not to be ashamed that I helped build a company whose mission is now to make new cars more appealing”

Saman Bemel Benrud, trashmoon.com, 2022

“Maps can never be a perfect representation of the world – they are instead a representation of how the map-makers perceive the world. These companies don’t map for the same reasons we do, and because of that, I question deeply if our goals can align.”

Frederik Ramm, Bloomberg: “OpenStreetMap charts a controversial new direction”, 2021

Will OSM inevitably be dominated by bigcos?
